## NEWS

Welcome to our Fifth NewsLetter of Alien OPTimum NeWs which inside DEALs with The Omnipotent U.F.O. PHENOMENON.

I HOPE this NewsLetter is full of Helpful Clues and NEW inFormation for you The Reader.

Thank You

Editor

CASE NO. 1

### An Abduction In Fife(cont)

Countless small beings were carrying small boxes and canister which they would put on the ground, then pick up again, taking it to the larger craft that the witnesses had originally seen in the sky, but which was now on the ground. The witnesses described several large, "Transparent illuminated capsules", - type things, rippled on the outside with indentations like a brain. There were some very thin, small beings inside. Then they saw the capsules which reminded them of cocoons coming from the trees also with these small beings inside.

In fact these aliens were a hive of activity, so near the roadside, where they cannot have failed to have been missed. Suddenly, the cocoon like craft shot towards the witnesses and stopped four feet in front of them and many other figures scurried towards the now terrified humans. Panic stricken, they managed to escape in their car and headed home at top speed it was later when one of the female witnesses began having flashbacks and she now feels that they were all taken aboard the craft. She remembers a very bright place, she said, "I could not move they were doing things to me, they didn't hurt me so I felt happy, the little ones were smiling to me with their big eyes and taking things from me, which they gave to the larger creature that was controlling them with a probe like a rod". She goes on to describe the small beings as approximately four to five feet in height with nothing remotely human about them at all. They had big dark eyes with heads which were too big for their bodies. The events shook the people involved terribly and even now when they recall the event they burst into tears, one would think that it would leave them to have a nervous breakdown and in a way they hoped it would as they would hope that it was all in their imagination and that these types of creatures do not exist.

It has been said, that the witnesses have been left even more confused after investigators had left them, one pair even allegedly told them that they could see streaks of light emitting from their living room walls and that they had seen greys in various parts of their homes. Also said, that the witnesses' identities had been disclosed to friends and colleagues. The victims themselves report that the drama is not yet over and that they have seen in their homes small grey aliens in cowls (shades of the deros) and are subject to psychic attacks but whatever the actual nature of these attacks are, no one seems to know.

THE END.

CASE NO 2.

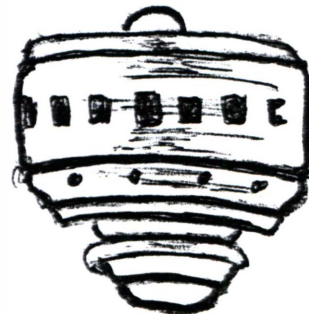

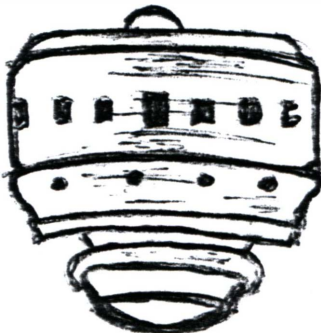

**The GULF BREEZE SIGHTINGS**

On the 11th of November 1987, builder and property developer, Ed Walters was in his house and looking out of his converted office window he witnessed a UFO move behind some pine trees across the other side of his street. Walters grabbed a Polaroid camera which he used on jobs and he took several pictures out on his front porch, he then ran out onto the street to get even closer to the UFO, when suddenly he was zapped by some sort of strange blue light, he could feel his feet raising off the ground, during this his mind was not untiring on this but on images of dogs. Then as soon as it began, it stopped and the light was gone and the UFO vanished he crashed to the ground and it was over, but was it no, Ed Walters over the next five months took more amazing photographs that were extraordinary to say the least, he claims he was abducted over that five month period.

As a result Ed Walters photographs, gulf breeze in Pensacola, Florida became a UFO hotspot with massive numbers of UFO skywatchers coming to UFO Gulf Breeze. However, while all these skywatchers looking up into the skies, somebody found a model of a UFO in Ed Walters loft similar to the ones in his photographs, he was branded a hoaxer, but photographic expert Dr. Bruce Maccabee who worked on the "Star Wars" Project gave Ed Walters a sealed stereoscope camera. (if you open it would damage the film) after getting this camera Ed Walters took even more remarkable picture of the very same UFO's.

CASE NO 3.

**UFOLOGY PROVES ITS POINT con't**

**AN ARTICLE BY MALCOLM ROBINSON ON A RECENT TV. SUCCESS FOR UFOLOGY**

His plea over, it was then the turn of the court audience to voice their opinion on the matter, and boy did they voice their opinion. The arguments swung from left to right as both sets of believers and non believers aired their views. Brian McMullan lead guitarist with Glasgow UFO Rock band CEIV was not being put off by the Astronomical explanations being given from the other side of the courtroom and he spoke with contempt at these views and gave a scathing attack on Campbell for supporting them. During the course of this live TV debate the viewers were asked to phone in with their views on the subject, did they believe in UFO's? had they seen one? soon the phones were virtually ringing off their hooks. The presenter then asked Garry Wood to inform the jury and watching TV audience about his (view) own UFO abduction. Garry delivered an emotional and honest account of his experience, in which was backed up by his friend Colin Wright who also shared this same double abduction. The sceptics continued to press home their views on UFO's as a non reality and could be explained away, at this point Malcolm Robinson came in and said to one sceptic, "have you ever actually sat down and studied the UFO data", to which the answer, was "No".

All too soon though, the programme was coming to an end, and both MR Robinson and Mr Campbell were asked to give a 45 second summing up of there case to the jury. Campbell continued to stress the point (with notes in hand) that UFO's were all misidentifications of ordinary mundane objects, whereas Mr Robinson stressed the need to examine the evidence for oneself to look and search for the honest UFO data which was there in abundance. With that, it was time for the jury to deliver their verdict what would it be? The courtroom was hushed as the jury foreman, was asked to give it's verdict, which was,

" we the jury find the case for the reality of the UFO Phenomenon, proven by 9 votes to 3. This verdict was greeted by ecstatic applause by the supporters of UFOLOGY, whilst the amateur and professional astronomer and UFO sceptic: professor Archie Roy, sat silent with facial expression of abject disappointment and disbelief! This victory for UFOLOGY, was made all the more sweeter knowing that we were up against strong opposition who were not ordinary members of the public as such, but professional and amateur astronomers.

So for the first time in British Television history, the case for UFO's was proven, but wait, there's more Grampian Television were snowed under by telephone calls from members of the public who also believed there was a case to be answered a staggering 86% of the public felt strongly that UFO's were a reality.

The Probare Institute Con't  
By John Baines

HIGH ALTITUDE ROCKETS:

The space - Quest foundation is a separate group who are developing low cost rocket technology to launch microsatellites into orbit. They have agreed to fly some of our equipment to high altitudes. The flights will launch detectors in areas of known UFO activity. Initially this will be as random as ground sightings, however, it may provide opportunities for close range photographs. Later flights will be targeted. It is reported that some Ufos circle the Earth in specific orbits. Rockets will launch instruments to approach the orbital heights and direction and using high speed video, film the area. Later it may be possible to orbit detection equipment.

## The Truth Is Out There

GROUND BASED RADAR:

We will be building a series of 2 metres radar dishes, they are not strictly radar, they will detect TV transmissions which are reflected off airborne craft. If you live near an airport then when a plane passes nearby your TV picture may suffer interference we will exactly use that principle but using equipment far more sensitive than a TV receiver.

ELECTROMAGNETIC DISTURBANCES:

A distant thunderstorm can cause your radio to crackle. If UFO's produce strong magnetic fields then similar effect will occur we will use very sensitive, "search coils". To detect any changes in the ambient electromagnetic field. A single coil is of limited use - it would be a stroke of luck if a UFO were to pass within detection range. Hence we will be setting up a network of coils, starting in the North East but eventually covering the whole country. If a UFO travels across country it would cause a "Blip" on coils beneath its path. By using computers to correlate and enhance the data from a coils it may be possible to plot the UFO's flightpaths. Please note that Lanarkshire UFO group has no alliance with the Probare Institute. Anyone requiring more information send a stamped address envelope to John Baines.(See other UFO Organisations at the back for address)
